Grupi punues u formua në bazë të:

- **vendimit të Ministrit të Shëndetësisë Nr 60/13 i datës 16/4/2013**
- **vendimit të Ministrit të Shëndetësisë Nr. 74/13 i dates 05/06/2013**

Prishtinë, Qershor 2013

PARATHËNIE

Ministria e Shëndetësisë e Republikës së Kosovës është e përkushtuar për një sistem shëndetësor unik dhe funksional ku në qendër të vëmendjes është pacienti dhe të drejtat e tij për shërbime sa më cilësore shëndetësore. Në kuadër të këtij synimi, që është i bazuar në Strategjinë Sektoriale të Shëndetësisë (2009-2014), si dokument themelor ne rrugën e zhvillimit afatmesëm të shëndetësisë kosovare, rëndësi e veçantë i kushtohet edhe sektorit të Farmacisë.

Në Strategjinë Sektoriale të Shëndetësisë është objektiv që të arrihet furnizimi me barna dhe material shpenzues nga Lista Esenciale në së paku 80%. Duke marë parasysh se buxheti aktual për shëndetësi dhe për farmaci nuk i mbulon të gjitha nevojat e institucioneve shëndetësore atëherë edhe po bëhen përpjekje që në mënyrë adekuate të bëhet caktimi i prioriteteve dhe kjo po bëhet në bazë të rekomandimeve nga OBSh sipas analizës së VEN-it.

Hartimi i kësaj analize për 2013 krijon bazë të mirë për një menaxhim shumë më të mirë të situatës për tërë zinxhirin furnizues me përfitime për tërë sistemin shëndetësor të vendit, dhe me përfitime të drejtpërdrejta për pacientët.

Hartimi i Planifikimit të Listës Esenciale për vitin 2013 është mundësuar përmes punës së përkushtuar të shumë ekspertëve të Institucioneve Shëndetësore të të tri niveleve të Republikës së Kosovës.

Lista Esenciale 2013

Përmbledhje ekzekutive

Një nga objektivat kryesore të Strategjisë Sektoriale Shëndetësore është zvoglimi i shkallës së Mortalitetit dhe Morbiditetit për popullatën e përgjithshme. Kurse një nga detyrat të cilat duhet realizuar për tu arritur ky objektiv është edhe furnizimi adekuat me barna dhe material shpenzues medicinal nga Lista Esenciale për Sektorin Shëndetësor.

Duke marë parasysh buxhetin cili i ndahet MSH nga MEF të shprehur në përqindje të GDP së vendit Kosova bën pjesë në vendet me përqindjen më të ultë të buxhetit për shëndetësi (rreth 2.3% e GDP), krahasuar me shtetet e rajonit 5-7% e GDP apo me shtetet evropiane 10% e GDP që përbëjnë buxhetin për shëndetësi. Kjo paraqet një ndër sfidat më të mëdha për arrtijen e objektivave të parapara me Strategjinë Sektoriale.
Kjo analizë fillon me Listën esenciale dhe me kërkesat e secilit institucion për barna dhe material shpenzues nga lista esenciale. Pastaj është bërë kategorizimi sipas analizës VEN duke bërë që këto kërkesa të mund të kenë prioritetet. Në fund është bërë analiza ABC në mënyrë që është analizuar kostoja e përgjithshme e secilit product ashtu që në bazë të vlerave duke u nisur nga më e larta.
Grupi punues në bazë të të gjeturave ka dhënë rekomandimet adekuate në mënyrë që të zhvillohet dhe të ketë mbarëvajtje të zinxhirit furnizues.

Të dhënat për shëndetësinë

Duke marë parasysh të dhënat buxhetore mund të shohim se buxheti i alokuar për Shëndetësi është jashtëzakonisht i ulët krahasuar me GDP si dhe me ndarjen e buxhetit në rajon dhe Evropë.

Në grafikun e mëposhtëm është dhënë lakorja e ndarjes së buxhetit për shëndetësi në 6 vitet e fundit.

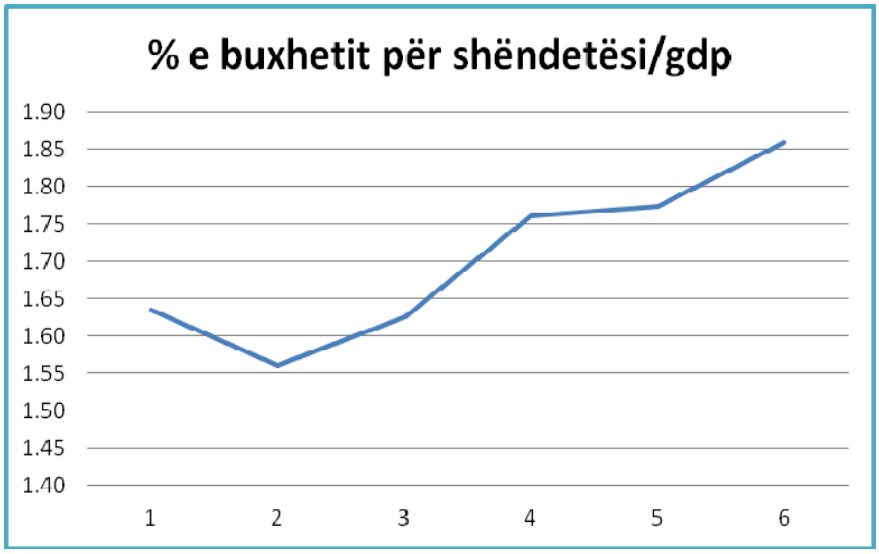

Fig 1. % e buxhetit për shëndetësi krahasuar me GDP

Në grafikun e mëposhtëm janë dhënë vlerat e buxhetit për shëndetësi prej vitit 2007.

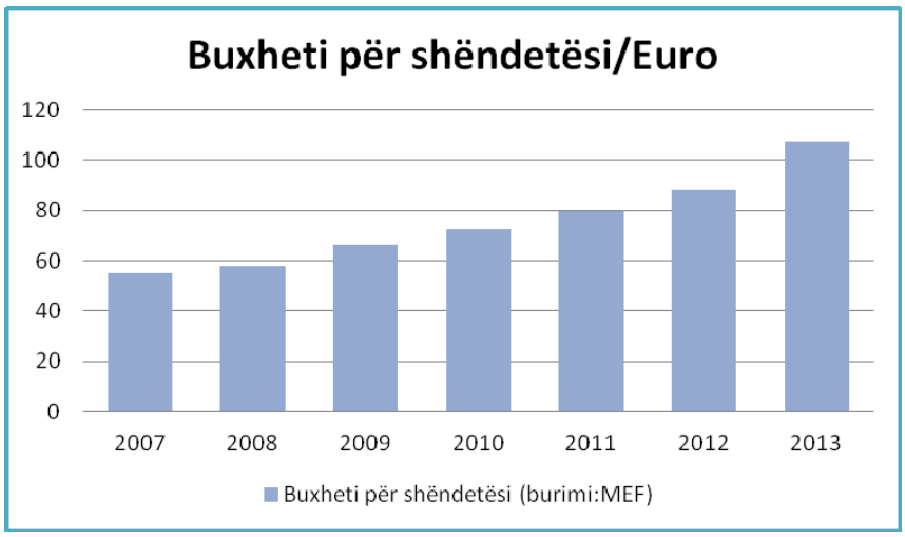

Fig 2. Buxheti për sëhndetësi në vlerë monetare

Në këtë grafik janë dhënë vlerat e buxhetit për farmaci prej vitit 2007. Në rast se marrim parasysh ndarjen e buxhetit për shëndetësi dhe farmaci në rajon (përkatësisht 5% e GDP për shëndetësi dhe prej kësaj 30-40% për farmaci) vlera e buxhetit për farmaci do të duhej të ishte së paku 70 milion Euro.

Sidoqoftë Ministria e Shëndetësisë është e përkushtuar që edhe me buxhetin aktual të përmbushë në mënyrë sa më adekuate kërkesat nga institucionet shëndetësore.

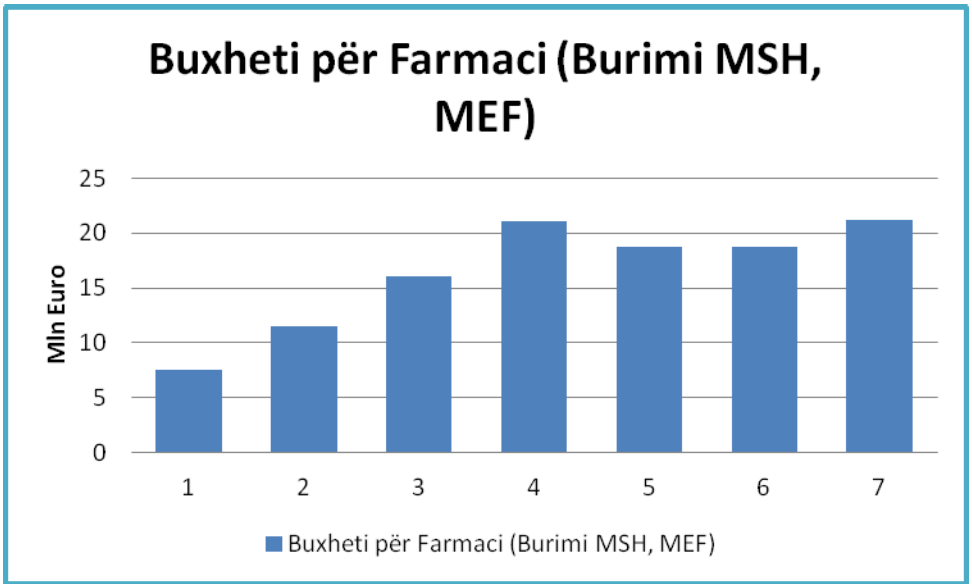

Fig 3. Buxheti për farmaci

Kjo është bërë me aplikimin e rekomandimeve të OBSH në kuadër të listës esenciale të Kosovës.

Fillimisht planifikimet kanë ardhur nga përgjegjësit e reparteve nga strukturat shëndetësore, struktura të cilat këtë planifikim e kanë përshtatur në bazë të nevojave të tyre por edhe në bazë të buxhetit i cili është në dispozicion për këtë aktivitet për vitin 2013.

Analiza e planifikimit fillon me planifikimin për vitin 2013 për tërë sistemin shëndetësor, vazhdohet me sistemin primar sekondar dhe terciar ndaras, më tutje zbërthehet analiza në secilën strukturë veç e veç dhe për secilin produkt veç e veç për vitin 2013.

Me tej Lista Esenciale e zbërthyer në detaje dhe në vlerë monetare për secilën strukturë.

Gjithashtu janë krahasuar edhe shërbimet shëndetësore të kryera në institucionet shëndetësore të të tri niveleve sipas grafikonit të mëposhtëm.

Spitalet	Shtretër	Operacione	Hospitalizime	Lindje
Sekondar	2371	15849	80415	14983
Gjakova	426	2687	16561	2105
Gjilan	454	2195	16706	2151
Peja	414	3518	17539	2525
Prizren	763	5138	20039	4409
Ferizaj	93	100	3548	1766
Mitrovica	149	745	1740	1361
Vushtrri	72	1466	4282	666
Terciar	2100	29024	84824	10480
QKUK	2100	29024	84824	10480
Total	4471	44873	165239	25463

Tabela 1 Të dhëna për shërbime shëndetësore për spitalet

Vlen të theksohet se Ministria e Shëndetësisë nuk ka kontrata për të gjitha produktet, prandaj për ato pa kontrata çmimet janë referente dhe mund te mos jene ato çka më vonë do të kontraktohen. Në rast të ndonjë gabimi teknik që mund të ketë ndodhur shpresoj se do të evitohet gjatë punës por edhe gjatë analizave të mëtejme.

Shpresojmë se kjo analizë do të shërbejë si referencë për planifikimet e ardhshme por edhe se do të realizohet sipas dinamikës së paraparë.

PLANIFIKIMI 2013

Përmbledhja e shifrave nga planifikimet për barna dhe material shpenzues për vitin 2013 është bërë duke bërë për kategoritë e lisëts esenciale si:

Barnat,

Materiali shpenzues

Citostatikët

Hemodializa

Vaksinat

Të tjera

Këto kërkesa janë bërë duke pasur parasush se buxheti është shumë i limituar. Pastaj kjo vazhdohet me shpjegimin e zgjeruar per secilën strukturë shëndetësore përsëri vetëm në vlerën monetare por duke i ndarë strukturat një nga një dhe duke i parë edhe diferencat e secilës në raport me njëra tjetrën por edhe në raport me vitin paraprak.

Pastaj vazhdohet me përmbledhjen e Listës Esenciale prej ku edhe janë marë vlerat e arritura. Lista esenciale është në formë të detajuar e paraqitur si dhe kërkesat për secilin produkt nga secila strukturë shëndetësore duke e përmbledhur totalin për vitin 2013. Njësoj është vepruar me barnat tjera, me citostatikët dhe me materialin shpenzues.

Kjo pasqyrë tregon në mënyrë të detajuar për secilin produkt të listës esenciale se sa njësi janë kërkuar nga secila strukturë shëndetësore, duke e llogaritur çmimin e blerjes dhe në fund vlerat e tyre janë përmbledhur në tabela më të thjeshtësuara duke mos i paraqitur produktet por vetëm kategoritë dhe strukturat që i kanë kërkuar dhe në fund është dhënë përmbledhja e vlerave të kategorive të kërkuara.

VEN dhe ABC

Sipas Organizatës Botërore të Shëndetësisë, për shtetet të cilat nuk kanë mundësi buxhetore që ti përmbushin të gjitha nevojat për shëndetësi atëherë aplikohen masa restriktive por me bazë shkencore të cilat nuk lejonë që vendim marrja të bëhet aty për aty.

Caktimi i prioriteteve është shumë i rëndësishëm sidomos në rastin e furnizimit me barna dhe material shpenzues, prandaj duke u nisur nga këto vështirësi OBSH ka futur në përdorim VEN analizën (Vital, Esencial and Nonesencial or Neccesary) Për qëllime praktike ne do ta quajmë Vitale, Esenciale dhe të nevojshme apo shkurt VEN analiza.

Duke qenë se nevojat për trajtimin e pacientëve në të gjitha institucionet janë shumë të larta, fillimisht edhe profesionistët shëndetësorë kanë pasur hezitimet për sasinë e barnave apo materialit që e kanë kërkuar por më tej meqë të gjitha kërkesat kanë arritur rreth 30 milion euro është aplikuar metodologjia VEN në mënyrë që Ministria e Shëndetësisë të sigurojë barnat e kategorisë së parë për 100% të nevojave.

Qëllimi i kësaj metodologjie është që fillimisht organi përgjegjës të bëjë furnizimin me barnat vitale pra ato që janë të rëndësishme dhe të domosdoshme për shpëtimin e jetës, pra që të kemi furnizim të plotë në departamente si Emergjenca, kujdesi intenziv, sallat e operacionit etj, pra në ato vende ku në asnjë moment nuk guxon të vihet në pikëpyetje disponueshmëria e barnave.

Pastaj në kategorinë e dytë janë barnat e quajtuar esenciale pra që jo medoemos janë të domosdoshme dhe në kategorinë e tretë janë barnat e nevojshme pra që në rast se ka buxhet ato mund të sigurohen nga autoriteti përgjegjës por nëse nuk ka buxhet nuk do të shkaktonin probleme jetike për institucionin.

Në anën tjetë barnat e kategorisë vitale pastaj do të kërkonin një kujdes edhe më të shtuar në aplikimin e indikatorëve të tjerë t menaxhimit të barnave si stoku minimal, stoku i sigurisë, data e skadimit, kartela e barit por edhe të fazave kryesore te menaxhimit të barnave si selektimi, prokurimi, distribuimi dhe përdorimi, pra do të kushtohet një kujdes i shtuar për barnat e kësaj kategorie.

ABC analiza

ABC analiza është e rëndësishme në aspektin e buxhetit. Kjo është një tregues për barnat e shtrenjta aty pra ku edhe duhet pasur kudjes që të kursehet buxheti.

Në bazë të rekonadimeve nga OBSH fillimisht bëhet kategorizimi i barnave të listës esenciale në bazë të sasisë, cmimit dhe vlerës së përgjithshme që at kapin për një vit. Pastaj bëhet kategorizimi duke filluar nga produktet me vlerën më të lartë. Përzgjidhen 20% e produkteve me vlerën më të lartë dhe në bazë të Ligjith Pareto këto përbëjnë rreth 80% të vlerës së përgjithshme.

Prandaj kujdesi i shtuar në këtë 20% të barnave dmth edhe kursim i jashtëzakonshëm në vlerën e përgjithshme të barnave apo materialit shpenzues.

psh në rastin e citostatikëve 20% e produkteve apo 11 produkte kapin vlerën prej 8.4 milion Euro apo 40% e buxhetit të përgjithshëm të farmacisë.

Në grafikonin e mëposhtëm është dhënë përqindja e llojeve më të shpeshta të kancereve.

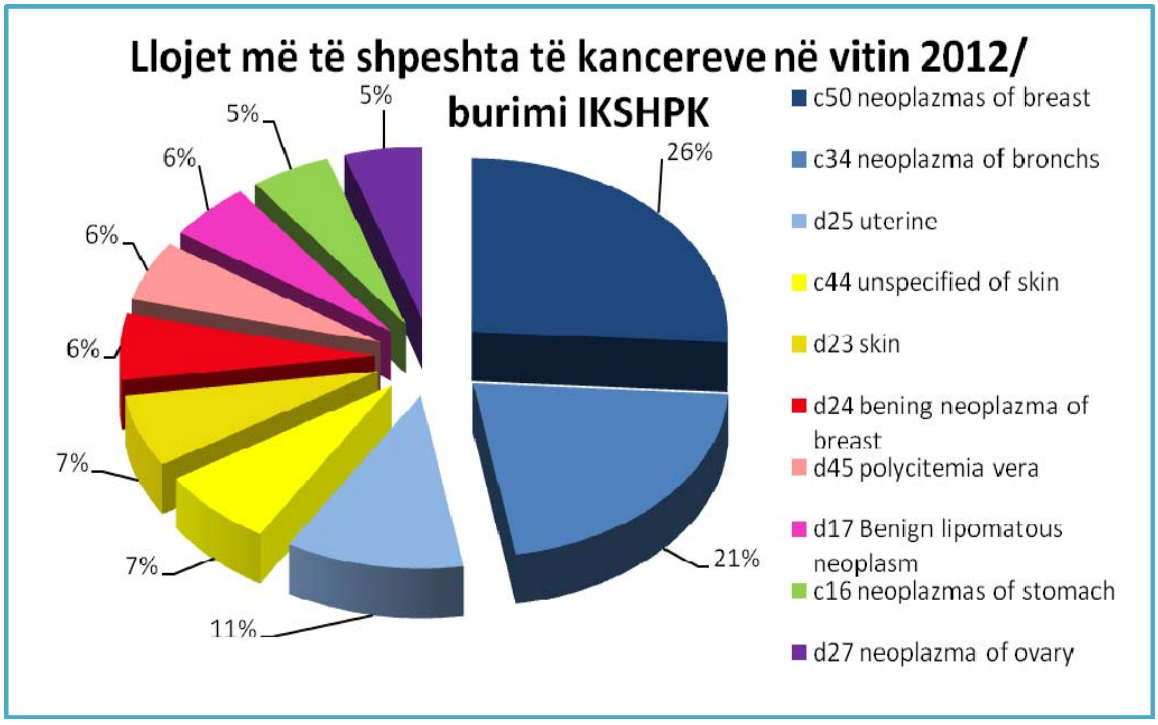

Fig 4. Llojet më të shpeshta të kancereve

REKOMANDIMET

Të përgjithshme

- Krijimi i komitetit per barna dhe terapi me detyra të qarta për monitorimin e proceseve në institucionet shëndetësore.
- Akreditimi i procedurave shëndetesore që jepen në institucionin shëndetësor fillimisht, primar, sekondar dhe terciar
- Hartimi i protokolleve klinike (aty ku mungojnë) për trajtimin e procedurave shëndetësore.
- Hartimi i protokolleve terapeutike bazuar në farmakoterapine racionale dhe studime farmakoekonomike.
- Hartimi i Listës esenciale bazuar në hapat e përmendur më lart.

Të veçanta për këtë analizë:

- restriksionet në kërkesa në bazë të nivelit shëndetësor psh peginterferon në nivelin primar, antibiotikë të caktuar të cilët duhet të rezervohen vetëm për nivelin terciar etj.
- restriksionet në sasi në bazë të shërbimeve që i kanë dhënë krahasuar me institucionet tjera të ngjashme dhe me vitet paraprake.
- restriksionet në produktet e shtrenjta pa arsyetim adekuat për përdorimin, numrin e pacientëve dhe të dhënat tjera relevante
- restriksione në produkte të kërkuara pa bazë.
- krahasimi i kërkesave për nivelin shëndetësor në bazë të protokolleve aktuale në MSh.

* inkurajohen profesionistët shëndetësor që të përzgjedhin barna kost efektive.
