Arie,

I am in touch with our mining advisors (subcontracted to our transaction advisors) on the excavator issue (new vs refurbishment of old).

It would be really helpful for them if we can get some update on where we stand with this issue

What has been tendered previously by KEK? (for new or old or both)

What was the outcome of that process?

What is the available budget? and is Government of Kosova still committed to provide a loan/credit to KEK for the excavators?

I will include you in cc list of correspondence with the mining experts if you wish.

Cheers,

Lorik
