Dear Arie,

The MESP on 01/02/2008 has taken a decision and granted an environmental consent to Merkur Company in order to perform activities within our property in Suka mine, Municipality of Gillogoc.

As you can see from the attached correspondence, Ferronikeli has never been approached to give its consent or not regarding this issue.

After several months (only last week) we received a copy of this decision and we have already asked twice a meeting with the Permanent Secretary of MESP to clarify our position.

This is to inform you that this issue is of major importance for our company and needs your personal and immediate attention.

Best regards
